Mammographic Radiographers' Intelligent Skills

Hands-on Positioning and Quality Control

Ms. Inga Margareta Arnberg

Chief Radiology Technologist, Department of Mammography, Falun Central Hospital, Sweden. Trainer / positioning in mammography, quality control, and 3-D automated ultrasound.

This four day workshop aims to improve the practices of radiographers working in the field of breast imaging by engaging them in intense theoretical sessions including hands-on training on imaging techniques, positioning skills and breast imaging quality control testing.

Radiographers will be trained on live cases at mammography units across the Kingdom, practicing positioning techniques using the most up-to-date guidelines.

Fee
\$ 200

Hands-on Screening Course

Combined with Multimodality Diagnosis of Breast Diseases with Emphasis on Breast MRI (Dr. Laszlo Tabar, MD, F.A.C.R (Hon))

This four day workshop, led by **Dr. Laszlo Tabar, MD, FACR** and members of his faculty, will bring together practicing **radiologists** from the MENA region, providing them with an intensive hands-on experience of breast cancer screening, early detection and diagnosis.

Participants will engage in breast cancer early detection dialogue while improving their diagnostic skills using the most up-to-date technologies.

COURSE FACULTY

László Tabár, MD., F.A.C.R. (Hon). Course Director

Professor emeritus of Radiology, University of Uppsala School of Medicine, Department of Mammography, Falun, Sweden

Mats Ingvarsson, MD

Medical Director, Department of Mammography, Falun, Sweden

Fee
\$ 300
